

FAASTeam presents:

What Every Pilot Needs To Know About Aircraft First Responders

This presentation will give you a new appreciation for all that goes on behind the scenes with Emergency First Responders at aircraft accidents.

Although this presentation is primarily for first responders, pilots that have attended have found it useful and have requested we make this training available. Many times the pilot (if able) is the first person to help passengers. Pilots based at small uncontrolled airports are often first on scene with aircraft accidents.

This 3.5 hour training covers unique hazards at aviation accidents such as ballistic parachutes, carbon fiber dangers when aircraft are on fire, etc. We will learn about aircraft familiarization and unique cases such as hot air balloons, sky dive injuries, military aircraft, and rotorcraft. Aircraft stabilization, egress procedures and aircraft entry procedures will be discussed. This is a fast paced, multi-faceted training, complete with live presenters, detailed slides and video based training – all created from local operators here at New England airports.

Completion of this course is a pre-requisite for Phase 2, which will be a hands-on, live portion at a local airport. Details are in the works for May, 21 2022. We are collaborating to have airplane, rotorcraft, balloon, glider, parachute, military,
